

## Recommended maximum number of cattle\* for trailers of different lengths.\*\*

Trailer size	Cattle Weight, lbs							Total Wt.***
	400	600	800	1000	1200	1400	1600	
(INSIDE DIMENSION)	Number of Head							
16 ft x 6 ft	18	12	9	7	6	5	4	<7400
18 ft x 6 ft	21	14	10	8	7	6	5	<8400
20 ft x 6 ft	23	15	11	9	7	6	5	<9300
24 ft x 6 ft	27	18	13	11	9	7	6	<11100
20 ft x 7 ft	27	18	13	10	9	7	6	<10800
24 ft x 7 ft	32	21	16	13	10	9	8	<13000
32 ft x 7 ft	43	28	21	17	14	12	10	<17300

\* This chart represents the maximum number of polled/dehorned cattle for trailers of different lengths; when hauling horned/tipped cattle, reduce the number of head by 5%

\*\* The number of cattle loaded during hot conditions should be reduced.

\*\*\* The maximum weight of cattle for each trailer size with these calculations. Do not exceed the Gross Vehicle Weight Rating for your truck and stock trailer.
